Preamplified PreIn inputs and highlevel SpeakerIn inputs allow for connection with any head units. Built to work both in mono, as part of a threechannel system with sub and front, and in stereo for a powerful twochannel system, HCP 4 is a unique model in terms of versatility! The dissipation system is optimized with the heat being transferred to the heat sink and then dissipated through the sides of the amplifier. The internal temperature remains constant at all power levels. Filtered preamplified outputs along with multiple adjustments are featured on the HCP 1D, offering the user endless connection possibilities with any source. Failure to do so could be hazardous and result in damage to your amplifi er. I had the amp but no manual and couldn't figure out the power ratings and whether it was stable at 2 ohms. Unfortunately Alpine themselves didn't seem to have it in their manual database. Every month or so I now get an email or two from people who happen upon my post asking me if I've still got the manuals, just goes to show how, after all these years, the 3553 is still alive and kicking.
